

How I Made \$17,497 within 60 days Finding Lost Bitcoin, Ethereum and Litecoin From Abandoned/Forgotten Wallets No Technical Skills Required

UNLOCK YOUR FUTURE

Hint: You will bank minimum of \$1,000 within 30 days without trading or joining any signal group using this crypto hack

Dear friend,

Trying to make money in the cryptocurrency market but finding it hard because you think that trading is the only option?

You may find it hard to stay profitable even after joining different signals groups that cost a lot of money.

There are lots of opportunities in the cryptocurrency space, and it is a booming industry.

The success you achieve in the space won't come from mere luck (although sometimes it does).

Have you started trading cryptocurrencies yet? I hope you haven't wasted too much money on trades trying to make it big...

Here's a little-known fact about cryptocurrency trading: **everyone loses money!**

Yes, everyone from the novice to the seasoned trader will lose money and continue to lose money on trades.

The market doesn't care how well you read charts or how much fundamental analysis you do; you will eventually be slapped out of some trades.

You see, I was good at many things

 I knew how to do technical analysis

 I was very good at trading

 I was joining many signal groups

As a matter of fact, one of the best coaches in the crypto industry taught me crypto

In spite of this, I was still broke and making peanuts from crypto

All because of 1 missing piece which is;

“Not Knowing How To Make Money From Crypto Without Trading Or Joining Any Signal Group”

That was when I realized that even with the best technical and risk management skills

I will continue to make peanuts if I don't figure out how to make money in crypto without trading

Also,

80% of your success in the crypto industry at the beginning depends on how much money you can make without trading...

This will help you to...

- ✚ Avoid paying money to join every signal group
- ✚ Avoid spending hours on projects that will end up as a loss
- ✚ Focus more on your learning
- ✚ Make money without spending hundreds of hours on telegram or slack

If you currently struggle to make money in crypto like me

I Have Good News For You

- ❖ You no longer have to spend years trying to figure out how to make money from crypto
- ❖ Or pay for expensive foreign softwares that only shows you how to trade Bitcoin, Ethereum, and Shitcoins/meme-coins

Making Money In Crypto Is Easy

And I'm about to hand it all to you

Initially, I didn't plan to bring this to the public.

DO YOU KNOW YOU ARE ABOUT TO MAKE A SHIT TON OF MONEY FROM THIS GUIDE?

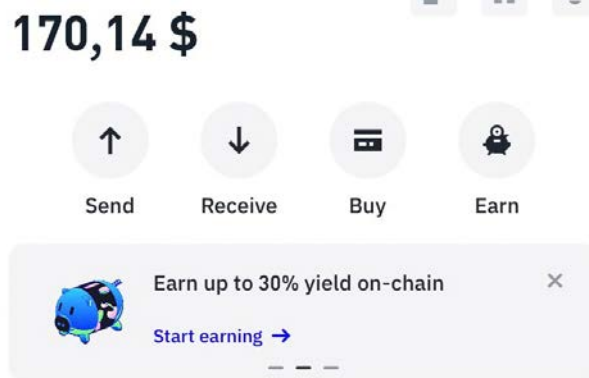

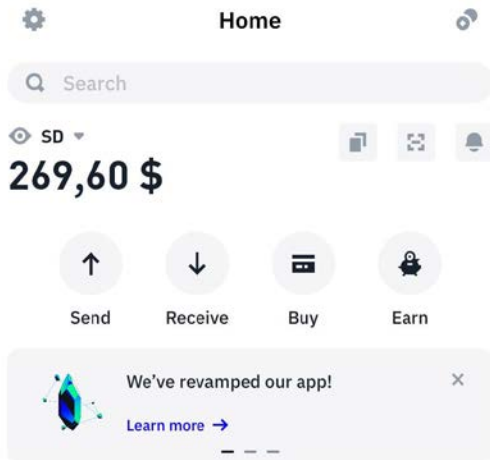

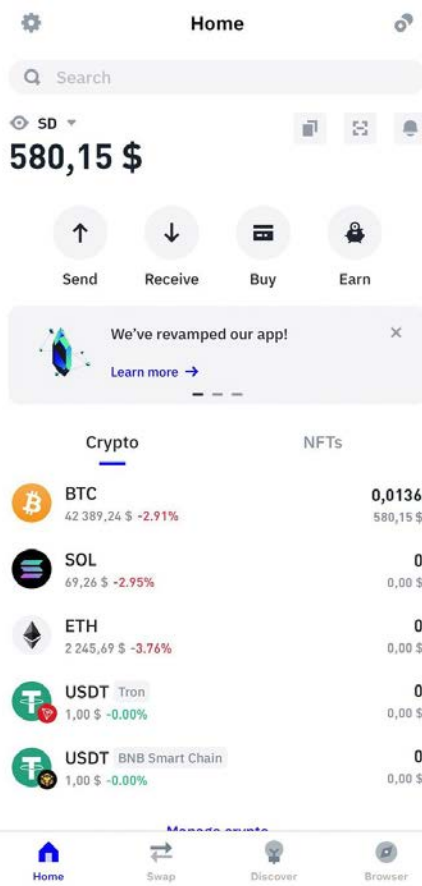

You are still guessing...

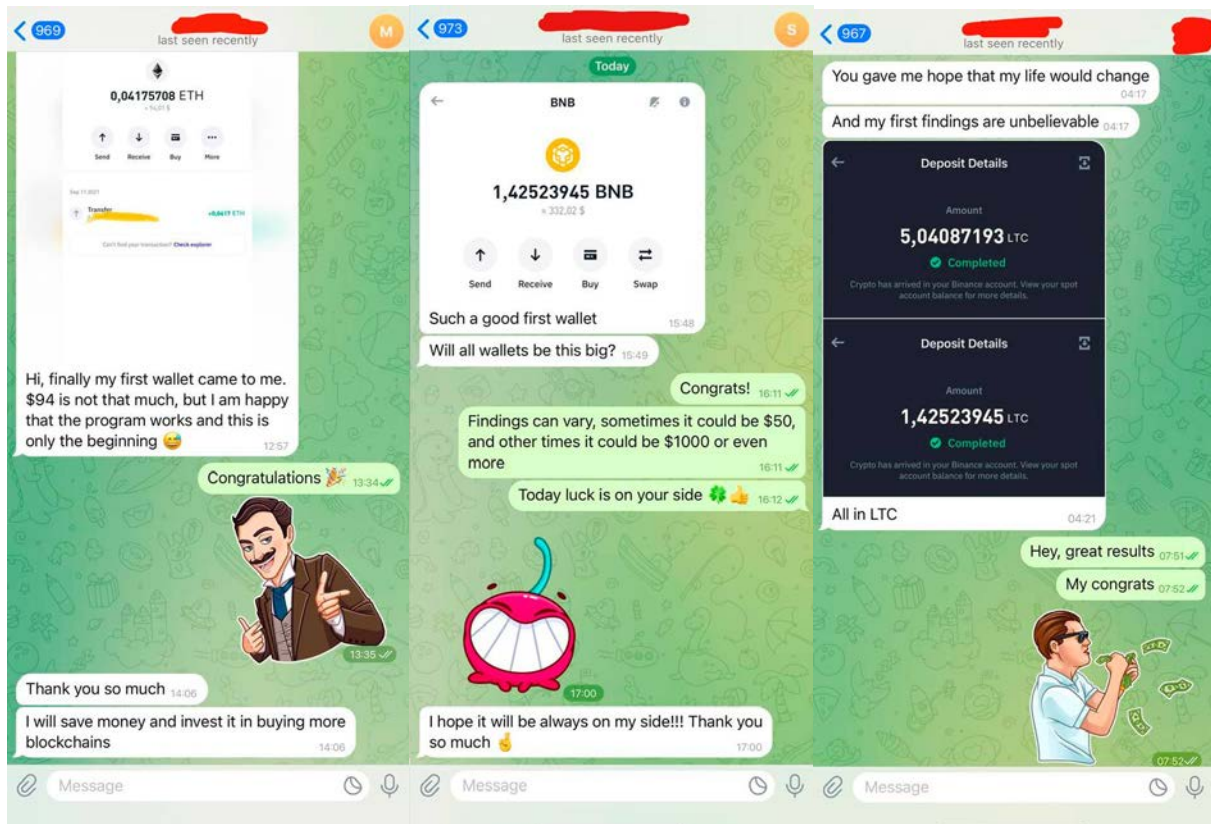

Well, you are about to be shocked!

The CRYPTO SPACE is a goldmine if only you can position yourself with the required information needed for your success.

I will be exposing you to the information you will need in order to make more than a thousand dollars with Crypto in 30 days (Well, a thousand dollars is just my conservative value. **I made \$17k+ in 60 days**)

In The Next Page are Snippets Of Money You Can Make With This Crypto Hack

So Read to the End because, in the next few minutes,

You will discover how you can bank a minimum of \$1,000 monthly in the crypto market without trading or joining any signal group.

So What Is This Crypto Hack and how do you make money in the cryptocurrency market without risking a heart attack as a result of losing money?

The Crypto Hack is finding lost crypto wallets that have not being accessed in a long time and transferring the funds to your own wallet.

You can simply look for lost wallets that have funds and then transfer the funds to your own crypto wallet using the secret software revealed in this guide!

The best way to make money with crypto (Bitcoin) in my own opinion is by getting it from abandoned/forgotten/lost wallets.

- ✚ You spend less and make so much more on the long run

- ✚ Also anyone can do it as it does not require any technical knowledge.

You can recover Crypto (bitcoin) using this software to find lost/forgotten wallets with funds in it and then transferring the funds to your own wallet.

The software test thousands of potential seed phrase combinations against generated wallets every few seconds so you are able to unlock access to the lost wallet

**To Get Access To The Crypto/Phrase Recovery Software
Click The Link Below**

<https://walletseedfinder.com>

You Can Also Check Their Telegram Channel

<https://t.me/+NXdStbvt0VcxOTQ0>

Check The Pinned Post In The Channel For More Information

**In The Channel, You Will Also See Videos of The Software In Action
*(You can as well download the demo from their site)***

What the Software does and how does it work

Whenever you create a Crypto Wallet, a **12-word "password" (Seed Phrase)** is generated.

Seed Phrases are based on a **BIP39 dictionary, made up of 2048 words**, from which combinations are randomly generated. With the Seed Phrase, a person **can access the Wallet** from any device and manage funds.

Thanks to the **algorithms developed connected to automatic Proxy Servers**, the Software finds the Seed Phrases of the **old generation Wallets** (reducing the total number of wallets to find and which have now been lost).

Once the Seed Phrase of a Wallet has been found with a balance, it displays it in the results window, and also saves the found wallets in a file in the folder with the software, so you can always look at wallets which the software found.

Revenue statistics

The average profit may be higher or lower than the numbers shown.

These are **statistical averages of our profits** for several months up to now using different packages.

The possibility of **being lucky and finding a large Wallet** is not excluded.

I have personally found **\$3k - \$5k** a few times in some wallets

Package Name	Average Monthly Income	Average Time To Find
One Blockchain	\$200 - \$400	1 – 2 in 7 to 14 days
Two Blockchain	\$300 - \$700	1 – 2 in 6 to 10 Days
Three Blockchain	\$450 - \$1,000	1 – 3 in 4 to 6 Days
Four Blockchain	\$600 - \$1,500	1 – 3 in in 72 Hours
Five Blockchain	\$1,000 - \$2,500	1 – 4 in 48 hours
Six Blockchain	\$2,000 - \$4,000	2 – 6 in 24 hours

Is it legal? Yes!

- **Wikipedia says:** “A private key is the main thing that gives you the ability to own and control your wallet and funds. **Whoever owns the private key owns the wallet.**”
- The software accesses **old generation Wallets** that haven't transacted for years and obviously **access to them has been lost.**

So you're not stealing someone's cryptocurrency, **you're taking back something that was lost.**

If you find a wallet with a balance that shows that someone is using it (the alleged owner), it is ethical not to withdraw the money!

How to withdraw after the Software has found a Wallet

1. After the software will find a wallet the **Seed Phrase** will be saved in results.txt file (located in software files).
2. Using this key (Seed Phrase) you need to **recover the found wallet** in Trust wallet app (Also you can use Exodus, Trustee or any other multi coin app).
3. After this **you will get full access to the wallet and funds on it.**
4. **Withdraw the crypto** on it anywhere you want. To Binance or your personal wallet, it's all up to you.
5. Done! **The found crypto is fully at your control.** You can save it or sell it.

It's all quite simple

Software requirements

It Works Only On Windows System and requires a minimum of 1gb ram, 1 core and 25gb storage. You can just buy RDP from any of these sites. Does not require Admin access

<https://greencloudvps.com/budget-windows-vps.php>

or

<https://buycheaprdp.com/buy-cheap-rdp>

I personally use GreenCloudVPS

Some Facts For You

≈ **\$126,000,000,000** of BTC is locked by people who lost their seed keys
